

# Data Analytics & Reporting

In the absence of robust analytics, physician practices often make critical decisions based on gut feelings, anecdotal evidence or incomplete data.

This often leads to unintended consequences, costly inefficiencies, wasted resources, missed opportunities for improvement and worse, compromised care.

**Without advanced analytics, practices are at a higher risk of non-compliance, which can lead to \$1.5M in penalties\***

**Insights** is a powerful dashboard and analytics module within the Focus Platform that transforms vast amounts of data into actionable intelligence.

Leveraging information from sources such as EHRs, patient portals, medical devices and administrative systems, this module helps you unlock value significantly faster and at a fraction of the cost of building a solution in-house.

No longer a luxury, advanced analytics are a critical necessity for:

- Patient satisfaction
- Regulatory compliance
- Operational improvements
- Strategic growth.

# FOCUS PLATFORM

## Built for Healthcare

## Why You Should Choose Focus Solutions

Exclusive to healthcare, we have a unique line of sight into the challenges facing your practice. Here's what else sets us apart and makes us the ideal partner for your data analytics and reporting needs:

### Speed to Value

For analytics to truly drive action, your reports and dashboards need to be powered by real-time data. Equally critical is the ability to analyze multiple data sources from various systems, both inside and outside your organization.

Without this, you're stuck with manual, time-consuming processes—trying to combine disparate data into a single report, only to find the insights are outdated by the time you're done.

### Robust Insights Library

Our automated insights bring a level of power most practices aren't even aware of. Whether you use our pre-built dashboards or opt for custom reporting, we simplify your data, delivering actionable intelligence that drives results immediately, not months or years down the road.

We provide analytics to support critical business decisions, such as identifying which services to expand or reduce, optimizing staffing and resource allocation, tracking practice KPIs, provider performance, patient satisfaction scores and more.

Additionally, we fuel your strategic growth by offering data-driven analytics on market demand and your competitive landscape, helping you avoid costly missteps that stem from incomplete or subjective information.

## Trusted Technology Ally

As a strategic partner to the EHR and PM vendors you trust, we empower you to shift from reactive to proactive care.

By identifying key areas for improvement and growth across clinical, operational and financial domains, we enable you to enhance efficiency, optimize performance and deliver superior patient outcomes.

## Next Up...

Now that we've analyzed all of your data and created these powerful insights, it's time to see it come to life via our workflow tools and automation processes designed to drive business results.

Check out our **Workflow Automation** one-pager to learn how!
