

Managed IT Services

Having a robust and secure IT infrastructure is no longer just a necessity—it's the backbone of your practice's success.

Without a trusted IT partner, you expose your practice to severe risks including data breaches, operational disruptions, regulatory penalties, financial losses and most critically, compromised patient care.

55%
of financial penalties imposed
were on small medical practices*

Systems is a robust IT operations module that maximizes the performance and security of your technology infrastructure.

Combining advanced monitoring, management and governance within a HITRUST framework, this module scales to meet your unique needs – from new technology integrations to network support to IT strategy, ensuring your practice:

- Operates seamlessly and securely
- Delivers uninterrupted, high-quality patient care
- Is strategically positioned for long-term growth and success.

FOCUS PLATFORM

Built for Healthcare

Why You Should Choose Focus Solutions

Exclusive to healthcare, we know exactly what it takes to run a successful practice. Here's what sets us apart and makes us the ideal partner for your IT needs:

Domain Knowledge

We have an unparalleled understanding of the clinical, operational and financial systems you rely on to run your practice. Our expertise spans EHRs, practice management and billing systems, medical devices and much more.

This specialized knowledge is crucial, as non-specialized vendors often treat these systems as third-party applications, dismiss issues as 'out of scope' or rely on external vendors for assistance. All of which can lead to extended downtime and increased costs for your practice.

IT Operations & Security Framework

Our proprietary IT operations framework with built-in HITRUST security standards provides a best-in-class infrastructure for managing, safeguarding and optimizing your IT systems – delivering a level of expertise and protection unmatched by in-house efforts or other vendors.

This is critically important because even a minor security breach or operational failure can lead to significant consequences.

By entrusting us with your IT management, you are not only safeguarding your investment but also ensuring uninterrupted operations, protecting sensitive data, and maintaining the trust of your patients and partners.

Trusted by Veradigm!

As a trusted channel partner of Veradigm, we provide unsurpassed expertise in configuring, integrating and optimizing their technologies.

This trust empowers us to:

- Prevent costly disruptions
- Streamline clinical workflows
- Elevate care delivery
- Strengthen your practice's financial performance.

Next Up...

With your IT infrastructure now in good hands, it's time to turn your data into a valuable asset.
