FOCUS PLATFORM
Built for Healthcare

Safeguard Your Data, Protect Your Patients & Propel Your Business Forward

As physician groups expand, so too does the complexity of their IT and data ecosystems – frequently outstripping the capabilities of their legacy solutions.

Often, these legacy systems are built for isolated use cases, creating an environment where systems don't communicate effectively, data gets siloed and inefficiencies disrupt operations.

This fragmentation of technology doesn't just slow things down—it can compromise the quality of patient care and put your practice at risk.

Unlock a Seamless Technology Experience

At Focus Solutions, we believe the key to a better healthcare experience is by optimizing and unifying your technology. When your IT systems work in harmony, your practice can dedicate more time to what truly matters: caring for patients.

Why Choose Focus Solutions?

We're more than a managed IT provider.

Exclusive to healthcare and backed by the trust of 1,000+ organizations, we understand the demands of clinical workflows, integration requirements and stringent regulatory standards.

From network security to system uptime, data management to compliance, advanced analytics to automation, we manage every aspect of your IT and data environment so you can focus on what matters most – your patients.

Our Focus Platform integrates fragmented technologies into a seamless, intuitive ecosystem that enhances clinical and operational efficiency, ensuring your practice:

- Operates seamlessly and securely – mitigating risk and ensuring compliance with healthcare regulations

- Delivers uninterrupted, high-quality care – ensuring technology doesn't stand in the way of patient outcomes

- Is ready for future growth – providing scalable, flexible solutions that adapt to your evolving needs, and improve operational and financial performance.

Let us remove the friction in your IT infrastructure so you can focus on performance.

Utilize the Power of the Focus Platform ....

The Focus Platform enables you to focus on what drives your practice—delivering exceptional patient care, running a successful business and planning for your growth.

SYSTEMS

Standardize and secure your IT infrastructure

Systems is a robust IT operations offering that maximizes the performance and security of your technology infrastructure.

Combining advanced monitoring, management and governance within a HITRUST framework, we scale to meet your unique needs – from medical device integrations to network and end user support to IT strategy.

DATA

Migrate mission critical EHR data

Data is a health information management module that collects, unifies and stores disparate data from diverse and myriad sources within and outside the four walls of your organization.

Centralizing it for streamlined access, this module enables the efficient and consistent use of information across your organization.

CONNECT

Streamline the flow of discrete data

Connect is a comprehensive data integration module that combines and coordinates various internal and external data sources, applications and systems.

Providing a single hub for point to point integrations, this module eliminates information silos, streamlines workflows and optimizes clinical and financial performance.

INSIGHTS

Create real-time insights across multiple data sources

Insights is a powerful dashboard and analytics module that transforms vast amounts of data into actionable intelligence.

Leveraging information from EHRs, patient portals, medical devices and administrative systems, this module helps you unlock value significantly faster and at a fraction of the cost of building a solution in-house.

WORK FLOW

Automate time-consuming and routine tasks

Workflow is an advanced process management module that automates repetitive, labor-intensive and error-prone tasks, ensuring standardized and optimized procedures.

Building on the foundation of Systems, Data, Connect, and Insights, the Workflow module boosts efficiency and streamlines productivity, enabling your team to focus on higher-value tasks that directly impact patient care.

Healthcare Exclusivity
- 15+ years' proven experience
- 1,000+ customers

Domain Expertise
- 600+ EHR deployments & data conversions

Trusted Technology Ally
- Strategic partner to the EHR and PM vendors you trust
